

3. Machine Learning Concepts

Introduction to Module 3

Module-Level Objectives

As a result of the instruction in this module, students will be able to:

1. Define classification and identify the four steps involved in a classification problem.
2. Describe the concepts of training and testing in machine learning.
3. Calculate classification accuracy.
4. Differentiate between supervised and unsupervised classification with examples.
5. Explain regression and distinguish it from classification applications.

(CO = Course Objective. This demonstrates the alignment from the module objective to the course objective[s].)

To Do

All activities in this module are required unless otherwise noted. If you have questions or ideas, refer to the [FAQ Discussion \(https://canvas.fau.edu/courses/169551/discussion_topics/1804306\)](https://canvas.fau.edu/courses/169551/discussion_topics/1804306). Complete the following:

1. Review the PDF file.
 2. Watch the Lecture Videos.
 3. Complete Quiz #3.
